

ESTRO 36
5-9 May 2017
Vienna, Austria

ESTRO 36 will take place from 5-9 May 2017 in Vienna, Austria and the event represents the premier platform for radiation oncology in Europe.

ESTRO 36 will draw attention to the multidisciplinary and interdisciplinary components of the radiation oncology practice, with emphasis on the new opportunities that they represent for all professionals of oncology, not only in research but also in the daily care of patients.

The Scientific Programme Committee and Scientific Advisory Groups of ESTRO 36 are hard at work to develop joint sessions with other European and international oncology societies.

The educational aspects of ESTRO 36 will include pre-meeting courses, teaching lectures, contouring workshops and multidisciplinary tumour board sessions.

The ESTRO annual meeting has developed into a successful scientific event due to high level contributions via abstract submissions. The Scientific Programme Committee is committed to offering large visibility to promising abstracts by including them in the scientific symposia or via dedicated poster viewing sessions.

Last but not least, all of the leading exhibitors will contribute to ESTRO 36, Europe's largest industrial exhibition in radiation oncology, offering the opportunity to view the latest products and services in cancer treatment and cancer care.

Please note that some important deadlines for the conference are coming very soon:

24 October 2016 for abstract submission

18 January 2017 for early registration

More information on the ESTRO 36 on <http://estro.org/congresses-meetings/items/estro-36>

I look forward to seeing you next May in Vienna for this thrilling event.

With warm regards

Yolande Lievens
ESTRO president
